R Bootcamp Day 2

Quarto

Christopher T. Kenny
Data-Driven Social Science

DATA-DRIVEN SOCIAL SCIENCE
PRINCETON UNIVERSITY

Table of contents

What is Quarto?

Quarto

- Publishing system based on Pandoc
  - Input a markdown document, render to anything supported by Pandoc
    - HTML, PDF, Word, Beamer, GFM, MediaWiki, etc.

Quarto

- Publishing system based on Pandoc
  - Input a markdown document, render to anything supported by Pandoc
    - HTML, PDF, Word, Beamer, GFM, MediaWiki, etc.
- Built by Posit, PBC (formerly RStudio)

Quarto

- Publishing system based on Pandoc
  - Input a markdown document, render to anything supported by Pandoc
    - HTML, PDF, Word, Beamer, GFM, MediaWiki, etc.
- Built by Posit, PBC (formerly RStudio)
- Syntax builds on RMarkdown, but language agnostic
  - Existing `.Rmd` files and most Jupyter notebooks can be run by Quarto

Quarto

- Publishing system based on Pandoc
  - Input a markdown document, render to anything supported by Pandoc
    - HTML, PDF, Word, Beamer, GFM, MediaWiki, etc.
- Built by Posit, PBC (formerly RStudio)
- Syntax builds on RMarkdown, but language agnostic
  - Existing `.Rmd` files and most Jupyter notebooks can be run by Quarto
- Reproducible system to combine code and text together

Rendering Behind-the-Scenes

Figure from https://quarto.org/docs/faq/rmarkdown.html

The .qmd file

Two main components:

The .qmd file

Two main components:

1. YAML header

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter
3. Identify output type (e.g., PDF, PowerPoint, HTML)

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter
3. Identify output type (e.g., PDF, PowerPoint, HTML)
4. Style the document (e.g., pick fonts `mainfont: Libre Franklin`)

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter
3. Identify output type (e.g., PDF, PowerPoint, HTML)
4. Style the document (e.g., pick fonts `mainfont: Libre Franklin`)
2. Body

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter
3. Identify output type (e.g., PDF, PowerPoint, HTML)
4. Style the document (e.g., pick fonts `mainfont: Libre Franklin`)
2. Body
3. Contains text

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter
3. Identify output type (e.g., PDF, PowerPoint, HTML)
4. Style the document (e.g., pick fonts `mainfont: Libre Franklin`)
2. Body
3. Contains text
4. Include LaTeX equations `$x^2$` becomes x^2

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter
3. Identify output type (e.g., PDF, PowerPoint, HTML)
4. Style the document (e.g., pick fonts `mainfont: Libre Franklin`)
2. Body
3. Contains text
4. Include LaTeX equations `$x^2$` becomes x^2
5. Write code chunks in R, Python, Julia, Observable, etc.

The .qmd file

Two main components:

1. YAML header
2. Specify title, authors, and frontmatter
3. Identify output type (e.g., PDF, PowerPoint, HTML)
4. Style the document (e.g., pick fonts `mainfont: Libre Franklin`)
2. Body
3. Contains text
4. Include LaTeX equations `$x^2$` becomes x^2
5. Write code chunks in R, Python, Julia, Observable, etc.
6. Include raw chunks with format-specific code (e.g., HTML or Typst blocks)

Why Quarto?

- Common input format for many output types

Why Quarto?

- Common input format for many output types
- Many journal templates for general and social sciences
  - Lowers the barrier on resubmitting elsewhere

Why Quarto?

- Common input format for many output types
- Many journal templates for general and social sciences
  - Lowers the barrier on resubmitting elsewhere
- Reproducible writing
  - Avoid copying data or hard-coding statistics
  - Place code + text together

Why Quarto?

- Common input format for many output types
- Many journal templates for general and social sciences
  - Lowers the barrier on resubmitting elsewhere
- Reproducible writing
  - Avoid copying data or hard-coding statistics
  - Place code + text together
- Write in Markdown instead of pure LaTeX (or Typst or HTML …)

Why Quarto?

- Common input format for many output types
- Many journal templates for general and social sciences
  - Lowers the barrier on resubmitting elsewhere
- Reproducible writing
  - Avoid copying data or hard-coding statistics
  - Place code + text together
- Write in Markdown instead of pure LaTeX (or Typst or HTML …)
- Markdown formats work well with version control

Why Quarto?

- Common input format for many output types
- Many journal templates for general and social sciences
  - Lowers the barrier on resubmitting elsewhere
- Reproducible writing
  - Avoid copying data or hard-coding statistics
  - Place code + text together
- Write in Markdown instead of pure LaTeX (or Typst or HTML …)
- Markdown formats work well with version control
- Makes it ideal for problem sets and general academic work

Output formats

- Articles: PDF (LaTeX, Typst), Word

Output formats

- Articles: PDF (LaTeX, Typst), Word
- Slides: Beamer, RevealJS, PowerPoint

Output formats

- Articles: PDF (LaTeX, Typst), Word
- Slides: Beamer, RevealJS, PowerPoint
- Websites: Dashboards, Static HTML, or Shiny

Output formats

- Articles: PDF (LaTeX, Typst), Word
- Slides: Beamer, RevealJS, PowerPoint
- Websites: Dashboards, Static HTML, or Shiny
- Books: PDF and HTML

Output formats

- Articles: PDF (LaTeX, Typst), Word
- Slides: Beamer, RevealJS, PowerPoint
- Websites: Dashboards, Static HTML, or Shiny
- Books: PDF and HTML
- All other formats supported by Pandoc (e.g., Wiki, Markdown, JATS, InDesign, ePub)

Including Text, Tables, Figures, and Code

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`
- Italics with `*italics*`

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`
- Italics with `*italics*`
- Bold with `**bold**`

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`
- Italics with `*italics*`
- Bold with `**bold**`
- Headers with `# Header Level 1`, `## Header Level 2`, etc.

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`
- Italics with `*italics*`
- Bold with `**bold**`
- Headers with `# Header Level 1`, `## Header Level 2`, etc.
- Lists with `- item` or `1. item`

Writing 101 in Quarto

Quarto builds on Pandoc’s flavor of Markdown

- Code blocks are fenced with backticks `` ` code ` `` becomes `code`
- Italics with `*italics*`
- Bold with `**bold**`
- Headers with `# Header Level 1`, `## Header Level 2`, etc.
- Lists with `- item` or `1. item`
- Links with `[text](url)` or <url>

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`
- Italics with `*italics*`
- Bold with `**bold**`
- Headers with `# Header Level 1`, `## Header Level 2`, etc.
- Lists with `- item` or `1. item`
- Links with `[text](url)` or <url>
- LaTeX math with `$math$` for inline or `$$math$$` for display

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`
- Italics with `*italics*`
- Bold with `**bold**`
- Headers with `# Header Level 1`, `## Header Level 2`, etc.
- Lists with `- item` or `1. item`
- Links with `[text](url)` or `<url>`
- LaTeX math with `$math$` for inline or `$$math$$` for display
- Reference figures, tables, and sections with `@fig-label`, `@tbl-label`, and `@sec-label`

Writing 101 in Quarto

Quarto builds on Pandoc's flavor of Markdown

- Code blocks are fenced with backticks ` code ` becomes `code`
- Italics with `*italics*`
- Bold with `**bold**`
- Headers with `# Header Level 1`, `## Header Level 2`, etc.
- Lists with `- item` or `1. item`
- Links with `[text](url)` or `<url>`
- LaTeX math with `$math$` for inline or `$$math$$` for display
- Reference figures, tables, and sections with `@fig-label`, `@tbl-label`, and `@sec-label`
- Reference citations with `[@citation]` for parenthetical or `@citation` for prose

Including figures

Basic figures can be included with `![]()` syntax:

```
![Caption](figs/DDSS-stacked_PU_shield_black.png)
```

Figure 1: Caption

Making a table

Tables use “pipe” syntax:

```
| University |  Color  |
|:-----------|--------:|
| Princeton  | #E98338 |
| Harvard    | #A51C30 |
| Cornell    | #B31B1B |
| Brown      | #ED1C24 |

: Red and orange university colors {#tbl-colors}
```

University	Color
Princeton	#E98338
Harvard	#A51C30
Cornell	#B31B1B
Brown	#ED1C24

Red and orange university colors

Including code

Control code chunk behavior with options:

- `#| echo: false` - Hide code, show output only

Including code

Control code chunk behavior with options:

- `#| echo: false` - Hide code, show output only
- `#| eval: false` - Show code but don't run it

Including code

Control code chunk behavior with options:

- `#| echo: false` - Hide code, show output only
- `#| eval: false` - Show code but don’t run it
- `#| warning: false` / `message: false` - Suppress warnings or messages

Including code

Control code chunk behavior with options:

- `#| echo: false` - Hide code, show output only
- `#| eval: false` - Show code but don't run it
- `#| warning: false` / `message: false` - Suppress warnings or messages
- `#| fig-width: 8` / `#| fig-height: 6` - Control figure dimensions

Including code

Control code chunk behavior with options:

- `#| echo: false` - Hide code, show output only
- `#| eval: false` - Show code but don't run it
- `#| warning: false` / `message: false` - Suppress warnings or messages
- `#| fig-width: 8` / `#| fig-height: 6` - Control figure dimensions
- `#| label: fig-myplot` - Add cross-reference labels

Including code

Control code chunk behavior with options:

- `#| echo: false` - Hide code, show output only
- `#| eval: false` - Show code but don't run it
- `#| warning: false` / `message: false` - Suppress warnings or messages
- `#| fig-width: 8` / `#| fig-height: 6` - Control figure dimensions
- `#| label: fig-myplot` - Add cross-reference labels
- `#| cache: true` - Cache expensive computations

Demo

Writing a Problem Set

```
quarto create project

Quarto Extensions

Selected academic journal templates

- General science: Science, Nature, PNAS, PLOS

Selected academic journal templates

- General science: Science, Nature, PNAS, PLOS
- Major publishers: Taylor and Francis, Cambridge University Press, Springer, Elsevier

Selected academic journal templates

- General science: Science, Nature, PNAS, PLOS
- Major publishers: Taylor and Francis, Cambridge University Press, Springer, Elsevier
- Social sciences: Annual Reviews, APSR, BJPS, PA, PSRM, Perspectives, APA, and more

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`
2. Write the paper in Markdown with embedded code

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`
2. Write the paper in Markdown with embedded code
3. Switch to a journal template: `quarto use template quarto-journals/jss`

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`
2. Write the paper in Markdown with embedded code
3. Switch to a journal template: `quarto use template quarto-journals/jss`
4. Add any journal-specific things to the header

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`
2. Write the paper in Markdown with embedded code
3. Switch to a journal template: `quarto use template quarto-journals/jss`
4. Add any journal-specific things to the header
5. Render to PDF: `quarto render manuscript.qmd`

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`
2. Write the paper in Markdown with embedded code
3. Switch to a journal template: `quarto use template quarto-journals/jss`
4. Add any journal-specific things to the header
5. Render to PDF: `quarto render manuscript.qmd`
6. Submit generated PDF (+ source files)

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`
2. Write the paper in Markdown with embedded code
3. Switch to a journal template: `quarto use template quarto-journals/jss`
4. Add any journal-specific things to the header
5. Render to PDF: `quarto render manuscript.qmd`
6. Submit generated PDF (+ source files)
7. Get desk rejected

Journal Articles

Workflow for academic writing:

1. Start with a preprint template: `quarto use template christopherkenny/ctk-article`
2. Write the paper in Markdown with embedded code
3. Switch to a journal template: `quarto use template quarto-journals/jss`
4. Add any journal-specific things to the header
5. Render to PDF: `quarto render manuscript.qmd`
6. Submit generated PDF (+ source files)
7. Get desk rejected
8. Reformat by importing next template `quarto add template christopherkenny/nature`
